Target Market Determination – Mutual High Yield Fund

This Target Market Determination (TMD) sets out the type of consumers for whom our product would likely be consistent with their investment objectives and financial situation. It forms part of Mutual Limited's design and distribution arrangements for the product.

We note that anyone interested in investing in this product should firstly refer to the Product Disclosure Document for the Mutual High Yield Fund. The Target Market Determination does not take into account any individuals objectives, financial situation or needs; rather it is a document which outlines details of the investments characteristics and attributes to investors.

Target Market Summary

Mutual High Yield Fund (MHYF) is appropriate for consumers seeking access to structured bond issuances. A fund that provides capital stability, regular income distributions, low interest rate risk and access to a strategy designed to receive returns in both rising and falling markets. The fund is suitable for a portfolio where the consumer has a medium to longer investment timeframe, low to medium risk/return profile and values access to capital within 21 days.

ISIN Code	AU60PRM87985
Date TMD approved	25 February 2025
TMD Version	1.4
TMD next review date	Planned for February 2027

Description of Target Market

	Investment Characteristic	TMD Indicator for product	Product description including key attributes
Investor's Investment Objective	Ability for Regular Income	In target market	Mutual High Yield Fund (MYHF) is designed to ensure capital stability but wishes to generate the majority of the return through income with the possibility of some capital appreciation. The fund offers a diversified exposure to quality Australian bonds, RMBS and ABS. Our target investor prefers exposure to defensive assets but otherwise seeks an investment return above the current inflation rate. They typically have a longer investment horizon, and don't require or value an immediate redemption ability; liquidity is 21 days.
	Capital Preservation	In target market	
	Capital Growth	In target market	
	Capital Guaranteed	Not in target market	
Investor's Intended Product Use	Solution/Standalone (75-100%)	Not in target market	Mutual High Yield Fund's (MHYF) investment universe is meticulously curated, encompassing a selective range of Australian securities – spanning investment grade, non-investment grade, and unrated assets – all subject to rigorous analysis. The Fund is primarily focused on capital preservation, with an emphasis on minimising credit risk and interest rate duration, typically maintained at around 90 days. A minimum of 80% of the fund is allocated to highly liquid assets. We cap the weighted average credit duration at under 5yrs and provide regular income through quarterly distributions to investors. The portfolio typically comprises between 75 and 100 securities, ensuring a balanced level of diversification.
	Core Component (25-75%)	In target market	
	Satellite/small allocation (<25%)	In target market	
Investor's Time Frame	Short (≤ 2 years)	In target market	Mutual High Yield Fund (MHYF) target investor will ideally have a longer term investment horizon over 2 years, however noting the fund can process redemptions in normal conditions within 21 days.
	Medium (≤ 6 years)	In target market	
	Long (> 6 years)	In target market	
Investor's Risk Profile	Very high	Not in target market	Mutual High Yield Fund (MHYF) target investor will be comfortable in holding defensive assets within their portfolio, and can accept greater fluctuations in returns as the investment is for a greater total return over a longer period.
	High	Not in target market	

	Medium	In target market	
	Low	In target market	
Investor's access and liquidity	Daily	Not in target market	
	Weekly	Not in target market
